**FULL-TIME EMPLOYEES (FTE)**

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

## WATER OPERATING SECTION FOOTNOTES

---

### Other Operating Revenues (Water) (Page W-04)

Please explain amounts in Account 474 in excess of \$2,000, including like items grouped. Please provide, for example, a short list or detail using other than terms such as "other revenues" "general" "miscellaneous" or repeating the account title.

Rent of water tower to cable company is rental income from the cable company.

Return on investment in meters is calculated using a 7% rate of return on a net balance of meters of \$100,738. This is then multiplies by 50% for the 50% use by the sewer.

---

### Water Operation & Maintenance Expenses (Page W-05)

For values that represent an increase or a decrease when compared to the previous year of greater than 30%, but not less \$2,000, please explain.

1) Supplies expenses vary depending on timing of purchases. At the end of 2005, they hired a new public works director that tried very hard to adjust inventory correctly. He had to add many items. Thus, there was a decrease in supplies expense.

2) Repairs - There was an increase in repairs due to a few large repairs relating to a lateral, a large water leak, and the digital scale.

---

### Water Utility Plant in Service --Plant Financed by Utility or Municipality-- (Page W-08)

If Additions for Accounts OTHER than 316, 343, 345, 346 and 348 exceed \$10,000, please explain. If applicable, provide construction authorization.

Additions and disposals were made during the construction of a new water tower that was completed in 2005. There was also road work done and utility work done underneath the roads. All of these projects were paid for with the 2003 bonds.

---

### Water Mains (Page W-17)

If Added During Year column total is greater than zero, please explain financing following the criteria listed in the schedule headnote No. 5.

Mains were financed by the 2003 bond borrowings.

Explain all reported Adjustments.

There was a new water supervisor this year and he stated that he noted on the map that there was this 8" mains, however no 8" mains were listed on the PSC report. These mains were not included in any construction or additions during 2005. Therefore, we have adjusted to account for these mains that must have been overlooked some year in the past.

---

### Water Services (Page W-18)

If net additions are greater than zero, please explain financing by following criteria listed in schedule headnote No. 3.

Service additions were financed by charges for new hookups and by the 2003 bond borrowings.

### Meters (Page W-19)

**If Tested During Year column total is zero, please explain.**

Yes, station meters are being tested every 2 years. However, there was no Public Works Director during 2005 so even though they were scheduled to be tested in 2005, it was overlooked and will be tested in 2006.

**Explain program for replacing or testing meters 1" or smaller.**

The program is to replace meters within 20 years, however, there is not a set percent or number that is replaced each year.

**Ss. PSC 185.83(2) states "Station meters shall be maintained to ensure reasonable accuracy and shall have the accuracy checked at least once every 2 years." Are all station meters being tested every two years? Answer yes or no. If no, please explain.**

Yes.

### Hydrants and Distribution System Valves (Page W-20)

**General footnotes**

The distribution valves are operated on a 3 year rotation.
